

Foot Size Guide

It is important to measure your child's feet regularly to ensure they have the best fit for comfort.

BEFORE YOU START

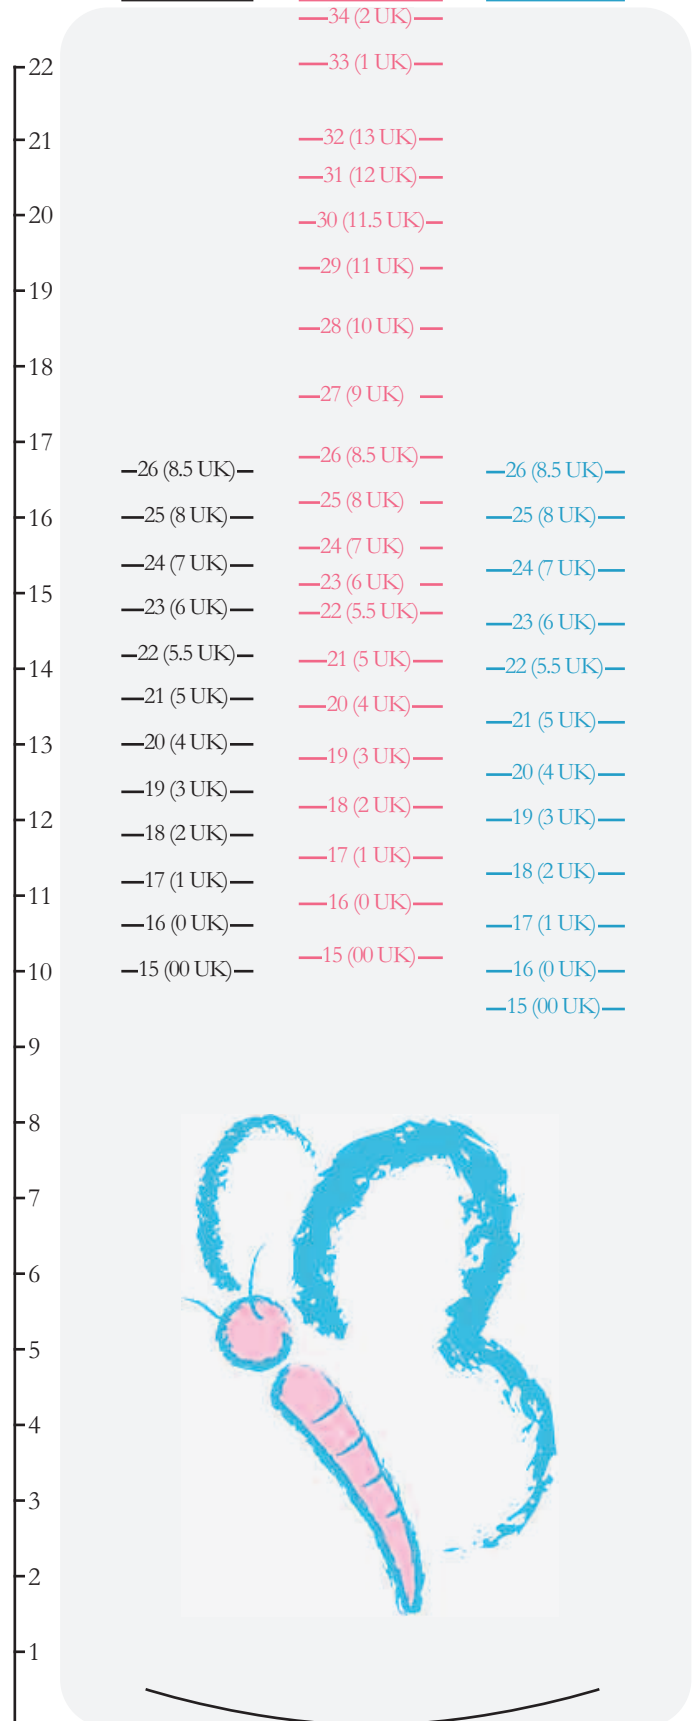

Is this page printed correctly?
Check your printer options and make sure that "page scaling" is set to "none"

Match your ruler here with ours to ensure accuracy. Line should = 22cm

5 Easy Steps to Find Your Child's Size:

1. Cut along the dotted line.
2. Place the size guide on the floor with a flat surface against the wall.
3. Place the child's barefoot on the guide, heel against the wall. The child should be standing, foot as straight as possible.
4. Draw a line in front of the child's longest toe. Repeat for the other foot. (Measure both feet for accuracy, if one foot is larger, choose the larger foot.)
5. Look for the nearest size that allows 0.3 - 0.85cm of extra space for your child's foot.

Fofito	Borboleta	Panyno
